Service

Spares

State of the Art Factory

The Airedale Spares Division is based at our UK Head Office and Manufacturing facility that covers a 25,000 m² site in Leeds. We hold an extensive stock of Spare Parts for all model types that can normally be provided on same-day or next-day delivery if specified.

Eliminate Costly Downtime

Airedale Spares Division recognise that time is of the essence and the quicker a replacement spare part is sourced and received the sooner the next job can begin, therefore minimising expensive downtime costs and ensuring complete customer satisfaction.

Our Priority

Our main priority is for equipment to be up and running again as soon as possible. Often the equipment is critical to the successful operation of an industrial process or to the uninterrupted running of a large computer centre or telecommunications network.

Hospitals rely heavily on safe and effective air conditioning and refrigeration systems to maintain comfortable conditions for staff and patients. Retailers know that the customer will spend more time and therefore more money when the shopping environment is comfortable and relaxed.

Every day our lives are governed by sophisticated infrastructures which we generally tend to take for granted. Air traffic control, television and broadcasting, information and commerce, railway and traffic networks all depend on automated systems which require accurate operating conditions. Air conditioning is there in the background every minute of the day, quietly keeping things running smoothly, until something goes wrong and the system grinds to a halt – cash machines not working, flights and trains delayed, telephones out of order etc.

That's where Airedale Spares Division plays such a vital role in providing each customer with immediate attention, rapid part identification and swift delivery of the required component direct to site, avoiding unnecessary downtime.

Airedale Spares Division provides:

- > genuine Airedale components
- > professional and experienced customer service
- > express delivery to any UK / International location
- > competitive prices on all spare parts
- > recommended spare parts listings for all applications
- > rapid Part Identification and technical support
